

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY
Deemed to be University
BHUBANESWAR-751024
School of Computer Engineering

Lesson Plan

Artificial Intelligence (CS30002)

Lectures:	3 Hrs / Week	Internal Assessment Marks:	50
		Activities:	30
		<ul style="list-style-type: none">• <i>Minimum Activities: 05 and types are quiz, assignment, viva, etc.</i>• <i>Faculty must share the continuous evaluation for 15 marks each before the Mid-semester and End-semester exams, respectively.</i>	
		Mid Sem Exam:	20
		End Term Marks:	50
Credits:	3		
Groups:	B.Tech.		
Faculty Name:-			
Contact Details:-			

Course Objectives:

CO1:-To understand the various characteristics of Intelligent agents

CO2:-To learn the different search strategies in AI

CO3:-To learn to represent knowledge in solving AI problems .

CO4:-To understand the ways of planning and acting in the real world

CO5:-To know about the models behind the AI application.

Module No. & Name	Topic/Coverage	No. of lectures	Lecture Serial no.
1. Introduction	<p>1.Introduction:- Use and Application.</p> <p>2. Definition:- Rationality, Thinking Humanly, Acting Humanly, Thinking Rationally and Acting Rationally. Turing Test, Four Capabilities for A.I system.</p> <p>3.Future of Artificial Intelligence.</p>	2	1-2
2. Intelligent Agents	<p>1.Characteristics of Intelligent Agents:- Agent Autonomy, Actuators ,Sensors, Environment, Performance Measure , Agent function and Agent Program. (Vacuum Cleaner Example, etc.)</p> <p>2. Agents and Environment:- Rational Agent , Discuss various environments, Specification of Task Environment (Using Examples).</p> <p>3. Typical Intelligent Agents and their Types:- Simple Reflex, Model based, Goal based and Utility based.(Discuss with Diagram).</p> <p>ACTIVITY- 1 [6 marks]</p> <p>(Must be conducted by 20.12.2024 covering Module nos. 1 & 2)</p>	3	3-6
3. Solving Problems by Searching	1.Defining a problem for state space searching. (State Space Representation of Water-Jug Problem, N-Queen Problem , Monks and Demons problem ,8-Puzzle problem ,etc.) <i>(One or Two problem to be explained in class others can be given for practice).</i>	1	7-19
	2. Search Strategies:- Search Tree, Solution Path, Nodes,Open List, Closed List, concept of space and time complexity.	1	
	3. Uninformed Strategies:- BFS , Uniform Cost	8	

	Search , DFS , Iterative Deepening, Depth Limited and Bidirectional. Discuss the Space and Time complexity of each Strategy.		
	<p>4. Informed (Heuristics Strategies) :- Concept of Heuristics , Admissibility and consistency, Greedy Best First Search , A* Algorithm. Discuss Admissibility, Consistency and Optimality of A*.</p> <p>ACTIVITY-2 [6 marks]</p> <p>(Must be conducted by 20.01.2025 covering part of Module no. 3)</p>	3	
4. Beyond Classical Search	1.Local Search Algorithms and Optimization Problems :- Objective Function , Global and Local Minimum/Maximum , Hill Climbing , Problems with Hill Climbing and Solution, Steepest Hill Climbing , Simulated Annealing, Genetic Algorithm (Fitness Function, Crossover and Mutation).	4	20-27
	2. Backtracking Search:- Concept of Constraint Satisfaction Problem , Formulation of problem into CSP. (Crypt-Arithmetic Problem and Map Coloring Problem).	2	
	<p>3. Adversarial Searching :- Concept of Two Players Game, Min-Max Algorithm , Alpha-Beta Pruning. (Tic-tac-toe as an Example)</p> <p>ACTIVITY-3 [6 marks]</p> <p>Mid -Semester</p> <p>(Must be conducted by 15.02.2025 covering Module nos. 4)</p>	2	
5. Knowledge Representation.	<p>1. Basic of Proposition Logic , Truth Tables ,Atomic Sentences, Complex Sentences, Quantifiers , Connectives.</p> <p>2. First Order Predicate Logic.</p> <p>3. Unification.</p> <p>4. Forward Chaining and Backward</p>	5	28-32

	<p>Chaining.</p> <p>5. Resolution.</p> <p>6. Knowledge Representation using First order Predicate logic.</p> <p>7. Logical Agents (Knowledge-based agents, the Wumpus World, entailment, inference, sound and complete inference algorithms, propositional logic, various inference procedures such as model checking and theorem proving, forward and backward chaining etc.)</p> <p>ACTIVITY-4 [6 marks]</p> <p>(Must be conducted by 15.03.2024 covering Module no. 5 prior to Mid Semester Exam)</p> <p><i>NOTE: 50% of Activities marks i.e. 15 marks to be announced to students before AI mid semester exam</i></p>		
6.Planning	<p>1. Planning with state-space search.</p> <p>2. Partial-order planning.</p> <p>3. Planning graphs,</p> <p>4. planning and acting in the real world.</p> <p>5. Plan generation systems.</p>	2	33-35
7.Probabilistic Reasoning.	<p>1. Uncertainty and Review of probability.</p> <p>2.Probabilistic Reasoning.</p> <p>3.Bayesian networks.</p> <p>4.Inferences in Bayesian networks.</p> <p>5. Temporal models and Hidden Markov models.</p> <p>ACTIVITY-5 [6 marks]</p> <p>(Must be conducted by 25.03.2025 covering Module nos. 5, 6 and 7)</p>	2	36-37

	END SEMESTER EXAM <i>NOTE: Inform total internal marks (50) to students prior to their End Sem Exam.</i>		
--	---	--	--

Text Books:

1. Artificial Intelligence: A Modern Approach, Stuart Russel, Peter Norvig, Pearson Education

Reference Books:

1. Artificial Intelligence, Rich, Knight and Nair, Tata McGraw Hill.
2. Principles of Artificial Intelligence, Nils J. Nilsson, Elsevier, 1980.

Evaluation Scheme:

ES No.	Evaluation Component	Percentage of Evaluation
1	Mid-Semester Examination	20
2	Activities	30
3	End-Semester Examination	50

Activity based Teaching and Learning:

Considering the guidelines circulated and after discussing with the faculty members, following activity based teaching and learning is proposed:

■ Activity List

Component wise distributions of the activities are listed below.

- Problem Solving Assignment
- Critical Thinking Assignment
- Quiz
- Viva / Presentation

Course Materials: Course Material will be provided for all topics which can be used as reference. The material consists of –

- Lecture Notes
- Class Work
- Home Work
- Supplementary Reading (including online study aids)
